

ACS Publications **Title:**
Most Trusted. Most Cited. Most Read.

Trimethylation Enhancement
Using Diazomethane (TrEnDi) II:
Rapid In-Solution Concomitant
Quaternization of
Glycerophospholipid Amino
Groups and Methylation of
Phosphate Groups via Reaction
with Diazomethane Significantly
Enhances Sensitivity in Mass
Spectrometry Analyses via a
Fixed, Permanent Positive Charge

Author: Karl V. Wasslen, Carlos R. Canez,
Hyunmin Lee, et al

Publication: Analytical Chemistry

Publisher: American Chemical Society

Date: Oct 1, 2014

PERMISSION/LICENSE IS GRANTED FOR YOUR ORDER AT NO CHARGE

This type of permission/license, instead of the standard Terms & Conditions, is sent to you because no fee is being charged for your order. Please note the following:

- Permission is granted for your request in both print and electronic formats, and translations.
- If figures and/or tables were requested, they may be adapted or used in part.
- Please print this page for your records and send a copy of it to your publisher/graduate school.
- Appropriate credit for the requested material should be given as follows: "Reprinted (adapted) with permission from (COMPLETE REFERENCE CITATION). Copyright (YEAR) American Chemical Society." Insert appropriate information in place of the capitalized words.
- One-time permission is granted only for the use specified in your request. No additional uses are granted (such as derivative works or other editions). For any other uses, please submit a new request.
